In 2014, Elizabeth (Liz) Garcia and her husband decided to move to Maleny at the time they were expecting their first child. Prior to this, Liz had been practicing as an independent speech pathologist in Brisbane. Liz has a great passion for her work and when discovering there were no private speech pathology services in Maleny, Liz decided to establish Beyond Words Therapy in order to provide a supportive service for the local community.

Beyond Words Therapy is a private speech pathology practice, which provides a mobile and clinic-based service to children, adolescence, parents and educators living in Maleny and the Sunshine Coast hinterland.

Liz offers the following services in her practice:

- Individual assessment and therapy
- Home-based programs
- School readiness screenings
- Small group therapy
- In-class therapy
- Teacher/parent training programs
- Consultative services.

Liz provides a high quality, family-centred service reflecting a combination of modern, research-based approaches designed to suit the needs of each individual. Liz works with a range of clients with a variety of communication disorders such as speech and language delays and disorders, social skills difficulties, stuttering, literacy difficulties, Autism Spectrum Disorders and Down Syndrome.

Liz brings a wealth of experience to her role in this profession, specializing in working with children with disabilities and speech and language difficulties. Liz has enjoyed working across a number of different professional sectors including, private practice, Government (Community and Disability Services) and also in community-based volunteer services in Kenya (Yellow House Children's Services).
