

Play it safe...

with your device!

Devices help us stay connected, but follow these tips to stay safe:

-  Lookout for exposed wires or a damaged cover on your charger or cord.
-  If your charger or cord is damaged, dispose of it and replace it with one that is suitable for your device and complies with Australian standards.
-  Your charger isn't waterproof – keep it dry.
-  To prevent your device from overheating, don't place anything on top of it while it's charging.
-  Don't sleep with your phone under your pillow, it can overheat and cause a fire.
-  Don't hold your phone, or use headphones plugged into the phone, while it is charging.
